## SUMMARY

Web developer with hands-on experience building web applications using React, TypeScript, Node.js and MongoDB. I have developed and deployed an e-commerce platform with payment integration (MercadoPago), improving the frontend architecture and user experience. I have experience in international customer service (LATAM and Spain), which has strengthened my communication and problem-solving skills. Passionate about scalable and impactful technology, I am currently expanding my knowledge in C#, .NET and Python for full stack development.

## AREAS OF EXPERTISE

---

- AI-Enhanced Frontend Development
- Frontend + AI: Build Web Applications with Artificial Intelligence
- Master the Frontend of the Future: React, UI, and AI Tools
- Creative Frontend with AI Assistants and Automation
- AI for Frontenders: Automate, Optimize, and Impress
- Smart Interfaces: Modern Frontend with AI
- Frontend Web Development Integrated with AI Solutions
- From Code to Intelligence: Frontend Development with Applied AI
- Web Design and Development Empowered by Artificial Intelligence
- Intelligent Frontend: Build Interfaces that Learn

## PROFESSIONAL EXPERIENCE

---

### Codifica Studio

*Junior Web Developer*

**Bogotá, Colombia**

Nov2023–Sep2024

- Contributed to enhancing e-commerce-focused web interfaces, applying usability principles and responsive design.
- Collaborated on translating and implementing Figma designs, ensuring visual fidelity and consistency from prototype to production.
- Optimized site performance, reducing load times and improving user experience across multiple devices. Supported the build-out of a scalable frontend, following best practices in component architecture and state management.

### Digital Andes

*Junior Web Developer*

**Quito Ecuador, Colombia**

Jan2022–Oct2023

- Learned how to structure scalable frontend projects by applying best practices in code organization and reusable React components.
- Translated Figma designs into responsive web interfaces, following UX/UI principles and user-centered design.
- Participated in real-world tasks involving **REST API** consumption, state management (useState, useEffect), and form validation.
- Collaborated in team workflows using **Git and GitHub**, managing branches, commits, and pull requests under supervision.
- Received continuous feedback through **code reviews**, improving my debugging skills and ability to write clean, efficient code.
- Got familiar with task management tools like **Trello** and agile methodologies for organizing work and tracking deliverables.
- Implemented basic performance optimization techniques to reduce load times and enhance overall user experience.

### INTELClA

*Customer Service Agent*

**Bogotá, Colombia**

Jan2023–Sep2023

- Resolved customer inquiries related to online and in-store ZARA orders
- Achieved high satisfaction levels by providing fast and effective responses

### ATENTO ESPAÑA S.A

*Sales and Customer Retention Agent*

**Bogotá, Colombia**

Nov.2021–Apr. 2022

- Applied effective retention strategies to prevent service cancellations
- Achieved a monthly customer retention rate of 80%

## EDUCATION

**University Compensar**

Systems Engineering student

**Bogotá, Colombia**

## ADDITIONAL INFORMATION

**Certifications:** Análisis Exploratorio de Datos en Python – SENA, Bases de Datos: Generalidades y Sistemas de Gestión – SENA, Pre Codeable – Introducción a Desarrollo Web – Codeable, JavaScript ES9, HTML, CSS3 y NodeJS desde cero- Udemy, Lógica de Programación (Básico y Avanzado) – Udemy; **Languages:** Spanish, English
